ALUD163

Aluminum case with stacking corners - 153L

Cable and hose protector designed to safeguard cables and pipes during the passage of heavy-duty vehicles. Easy top-loading makes it user-friendly. Made from rubber with 2 white reflective arrows for increased visibility. It features 2 channels, each measuring 135x120mm. It can withstand vehicle passages of up to 50 tons but is not recommended for use with light vehicles and forklifts equipped with polyamide or rubber wheels. It is easy to transport and interlock due to its handle and H-shaped connectors, and it can be secured using 4 attachment points. Additional adhesive can be used for further securing. Available in various dimensions.

Customs code 7612908000
EAN 3321360023087

Color : Grey

Material : Aluminum

Secondary material : Polypropylene

Specifications :

- Trunk designed for safe transportation and storage of products.
- Two straps that secure the lid during opening.
- Resistant to deformation, corrosion, and weather.
- Reinforced corners.
- Equipped with stainless steel locking mechanisms.
- Foldable non-slip safety handles.
