White/red metal post to embed-H 1,5 M / Ø 50

A ground-mounted bollard used to easily mark off access, either temporarily or permanently. The bollard can be securely embedded directly into the ground or used with bases to make it removable. Made of steel, it features three levels for hanging chains in four possible directions and a threaded top for attaching information signs. It comes with 2 hooks for chains and is available in various colors. Chains and barriers are sold separately.
