

Technical sheet

CO3R2

red cushion, case of two

A Berlin cushion is used to slow down traffic in urban areas. Buses, coaches, and bicycles are not obstructed by this device due to its wheelbase. They are used in areas where the speed limit should be reduced to 30 km/h. Installation is easy, quick, and cost-effective. The Berlin cushions comply with CEREMA recommendations. They are made of vulcanized rubber with wide, reflective shark teeth and reflectors. Delivered turnkey with fasteners, connectors, and hole covers. LED lights can be added as an option.
