Cable passage for road crossings

A cable bridge for road crossings designed to protect your cables and slow down traffic on public roads. Compliant with CEREMA recommendations. It measures 2.40 meters in length and has a height of 10 cm. It offers the advantage of quick and cost-effective installation. Made of vulcanized rubber with reflective shark teeth and reflectors. It comes ready to use with attachments, H links, and caps. You have the option to add LEDs for enhanced visibility if needed.
