

PNX-T100-TRIENT

Solar panel triangle. No entry-with flash in the corner-

LED solar panel is ideal for signaling road indications to motorists. The panel is 3 in 1: LED, a solar panel, and a battery. Thanks to the LEDs and the triflash, it is visible up to 500m. Made of aluminum and stainless steel with a vinyl reflective coating, Class 2, and a 3M EGP coating. With a fully charged battery, the panel operates for 10-12 hours (#18650 / 440mAh). IP65 protection level. It has 2 rails at the back for mounting on a pole (fixings and pole not provided). Can be customized with the road code.

Customs code 8531202090
EAN 3321360034282
