

POR2000RO

Swing gate on base plate

The swing gate on base plate 285 x 285 mm is designed to efficiently secure access points and control passage areas. Its adjustable length from 1150 to 2000 mm and Ø 115 mm post make it suitable for a wide range of professional, industrial, or public environments. With a $\pm 90^\circ$ pivot opening, it provides smooth and easy operation. The locking pin system ensures reliable closure, while the 6 fixation points guarantee a stable and long-lasting installation. Finished in red for optimal visibility, this durable swing gate is ideal for safe and effective access management.
