Solar panel - meeting point 500x700mm

A LED solar panel is ideal for signaling road information to motorists. The panel is 3-in-1: LED, solar panel, and battery. Thanks to the LEDs, it is visible up to 500 meters. Made of aluminum and stainless steel with a vinyl reflective coating, Class 2, and an EGP 3 M coating. With a fully charged battery, the panel operates for 10-12 hours (#18650 / 440mAh). IP65 protection level. It has 2 rails at the back for mounting on a pole (mounting and pole not provided). It can be customized with road signage.

Customs code

8608000000

EAN
