Pedestrian trench plate maximum load 700 kg - 1270 x 855 mm

Pedestrian trench cover mainly used during road works to cross a construction trench and ensure pedestrian access. Equipped with a non-slip surface and rubber edges for excellent adhesion to the ground. It also has anti-slip pads and steel reinforcements for added strength. High visibility thanks to its yellow colour. Supports a maximum load of 700 kg for a trench width of 50 cm and up to 350 kg for a trench width of 110 cm.

Customs code 3926909000
EAN 3321360034779

Color : Yellow

Material : HDPE

Secondary material : Steel

Specifications :

Length (mm)	Width (mm)	Height (mm)	Net weight (kg)
1220	800	30	13,30
