Work ramp 1 2000 x 600 mm - yellow with strips

A construction site ramp designed for safe passage across a construction trench. It is made of polypropylene with steel reinforcement and non-slip pads, providing extra stability and safety. This ramp has a width of 600mm and a length of 2000mm, making it suitable for various applications. It can also be interlocked with other ramps or fitted with end caps for versatility.
