

SAFETY10050

Slowing down cushion with H links

High-visibility speed cushion designed for traffic calming near hospitals, retirement homes, airports, and other areas requiring smooth traffic. It has a length of 2.5 meters and features wide Class 1 reflective and anti-slip bands, two cable passages, and H-links for connecting and stabilizing the speed cushions. Made from vulcanized virgin rubber, it can withstand the passage of 40-ton trucks, as well as exposure to grease, bases, and acids. Avoid prolonged contact with hydrocarbons.

Color : Black/Yellow

Material : Rubber

Specifications :

- High-visibility speed cushion designed to slow down traffic near hospitals, nursing homes, airports, and other areas requiring gentle traffic flow.
- Class 1 reflective and non-slip strips, 2 cable channels, and H-links to connect the speed cushions together.
- Supports vehicles up to 40 tons.
- Reduces speed from 5km/h to 30km/h depending on height and usage.
- SAFETY25 is intended for warehouses.
- Avoid prolonged contact with hydrocarbons.

Length (mm)	Width (mm)	Height (mm)	Crossing speed (km/h)
