

STOPBLOCKPASS/1

This bollard is sold with a unique opening lock but has the option to use a PASS key (a "master key" key, available as an optional purchase), which allows you to unlock other bollards when needed. It's ideal for use in a condominium, for example: the concierge can easily unlock all the bollards with a key, but not the other residents. The bollard is equipped with 2 polypropylene anti-friction rings for easy handling, and the 2 class 1 reflective red bands enhance its visibility. The bollard has hot-dip galvanized cast iron feet and comes with concrete fixations.

Customs code

7326909890

EAN
