

STOPSHAPE01JA

This rubber structure, to be attached with a parking barrier, is used for reserving a parking space. The attached structure helps protect the barrier when it's folded down to prevent vehicle passage. It includes 2 polypropylene anti-friction rings. The high-visibility yellow barrier has 2 class 1 red reflective strips. It comes with a single lock and a set of 3 keys. Stainless steel fasteners are provided to attach the barrier to the structure. Ground fasteners are optional (8 attachment holes).

Customs code 4016999790
EAN 3321360056030

Color : Yellow/Grey

Material : Steel

Secondary material : Rubber

Specifications :

- Rubber structure to attach with a parking bollard for saving a parking spot.
- The fixed structure helps shield the bollard when it's folded down to let vehicles pass.
- It comes with 2 polypropylene anti-friction rings, 2 Class 1 reflective red bands, and offers various locking options.
