

Technical sheet

STOPSHAPE114JA

This rubber structure is designed to be attached with a parking barrier for reserving a parking space. The attached structure helps protect the barrier when it's folded down to prevent vehicles from passing through. It includes 2 polypropylene anti-friction rings. The high-visibility yellow barrier comes with 2 class 1 red reflective strips. It is equipped with a triangle lock and an 14mm firefighter key. Stainless steel fasteners are provided to attach the barrier to the structure. Ground fasteners are optional (8 attachment holes).

Customs code 4016999790
EAN 3321360056061

Color : Yellow/Grey

Material : Steel

Secondary material : Rubber

Specifications :

- Rubber structure to attach with a parking bollard for saving a parking spot.
- The fixed structure helps shield the bollard when it's folded down to let vehicles pass.
- It comes with 2 polypropylene anti-friction rings, 2 Class 1 reflective red bands, and offers various locking options.
