

TPX140JA

Flexible bollard d.140mm-H 1000mm - yellow

Flexible memory-shape protection post with a 140mm diameter, designed to prevent damage to vehicles and equipment. In case of impact, the bollard deforms and returns to its original shape without breaking the anchoring or fastening. It resists tearing, pulling, and breaking. Used for separating and protecting different areas in warehouses. Height is 1000mm. To be directly fixed into the ground. Several optional features available: chain ring, fastenings.

Color : Yellow

Material : Polyurethane

Specifications :

- Flexible memory-form protection post designed to prevent damage to vehicles and equipment.
- In case of impact, the post deforms and returns to its original shape without breaking the anchoring or attachment.
- Resistant to tearing, pulling, and rupture.
- Used for separating and protecting different areas in warehouses.
