## TPZ1000CN

### Black flexible bollard with plate H 1000mm d.80mm + cylindrical head

Flexible shape memory black post, 80 mm diameter, cylindrical head, prevents damage to vehicles. In case of impact, the bollard deforms to return to its initial shape without breaking the sealing or fixing. Resistant to tearing, pulling, and breaking. Used for separating and protecting different areas in the city and parking lots. Height 1000mm. To be fixed directly in the ground. Fixings not included. Multiple options available: chain ring, reflective tape, fixing, specific color.
