

Flexible shape memory brown post, 80 mm diameter, cylindrical head, prevents damage to vehicles. In case of impact, the bollard deforms to return to its initial shape without breaking the sealing or fixing. Resistant to tearing, pulling, and breaking. Used for separating and protecting different areas in the city and parking lots. Height 930mm above ground. To be embedded directly in the ground or in a sealing box to make it removable (optional box). Multiple options available: chain ring, reflective tape, fixing, specific color.

**Color :** Brown (RAL8017)  
**Material :** Polyurethane

- Flexible memory-shaped bollard designed to prevent vehicle damage.
- In case of impact, the bollard deforms to its initial shape without breaking the anchoring or fixation.
- Resistant to tearing, pulling, and breaking.
- Various options available: head type, PMR standard, to be fixed or anchored, removable box, with or without reflective tape...

| Height<br>(mm) | Diameter<br>(mm) | Total height<br>(mm) | Type of post | Net weight<br>(kg) |
